Franchise systems, manuals and SOPs... made easy

FranchiseSimplySYSTEM - a HUB that details and integrates all the operations and software in your franchise to create one simple, easy to use operations manual...

4 BIG TARGETS

Every franchisor wants their system to meet...

EASY TO USE

A franchise operating system needs to be so easy to use that every franchisee and every staff member is delighted to go there first to get the answer to that immediately urgent question. This removes the frustration many franchisees feel when they have to go to support staff for answers to questions about small details. In turn this means each franchisee will make the same decision, resulting in a happy, successful franchise group that looks, feels and operates the same.

COMPREHENSIVE AND RELEVANT

Franchise systems need to be comprehensive enough to get the job done well but not so comprehensive that users drown in difficult to follow and often irrelevant instructions. The carefully constructed process we use to get the essential operating procedures down simply and effectively, mean that your system will be both user friendly and cover everything you need covered.

SECURE

Above all a franchise system needs to be secure. Secure from hacking. Secure from staff misuse. Custom permissions granted around both individual user needs and roles give you full control over who can see, edit and delete systems. Our state of the art servers make for a safe environment.

A SIMPLE FOUNDATION FOR TRAINING AND SUPPORT

In today's digital environment, every franchise system runs on a myriad of software systems which need to be brought together so they can be accessed quickly and efficiently. **FranchiseSimplySYSTEM** operations HUB does just that. Your operations are stored in our central secure software system that can be linked both within the system and out to other systems so it is easy for your team and franchisees to locate, use and improve everything. This means your support team and trainers focus on showing franchisees how to use the hub as a first port of call - making training and support more efficient and more effective.

Successful and happy franchisees and team - just what every franchisor loves...
